

August 2002

**Project Purpose:**

This Project will improve the overall linkage to the Fresno-Yosemite International Airport. The Peach Avenue Widening Project will greatly enhance passenger and freight services, while providing safer access for students and motoring public. Motorist will experience traffic congestion relief at the close of this project.

**Description:**

Peach Avenue widening project will consist of widening Peach avenue between Belmont and Butler Avenues from two-lanes to four-lanes with a landscaped median. By relieving the traffic congestion on Peach Avenue and facilitating the movement of goods and services, this project fulfills the intent of the Traffic Congestion Relief Program.

**Construction Cost:** \$ 10 million

**Construction to Begin:** Winter 2002

**Construction to End:** Fall 2004

**Funding Sources:**

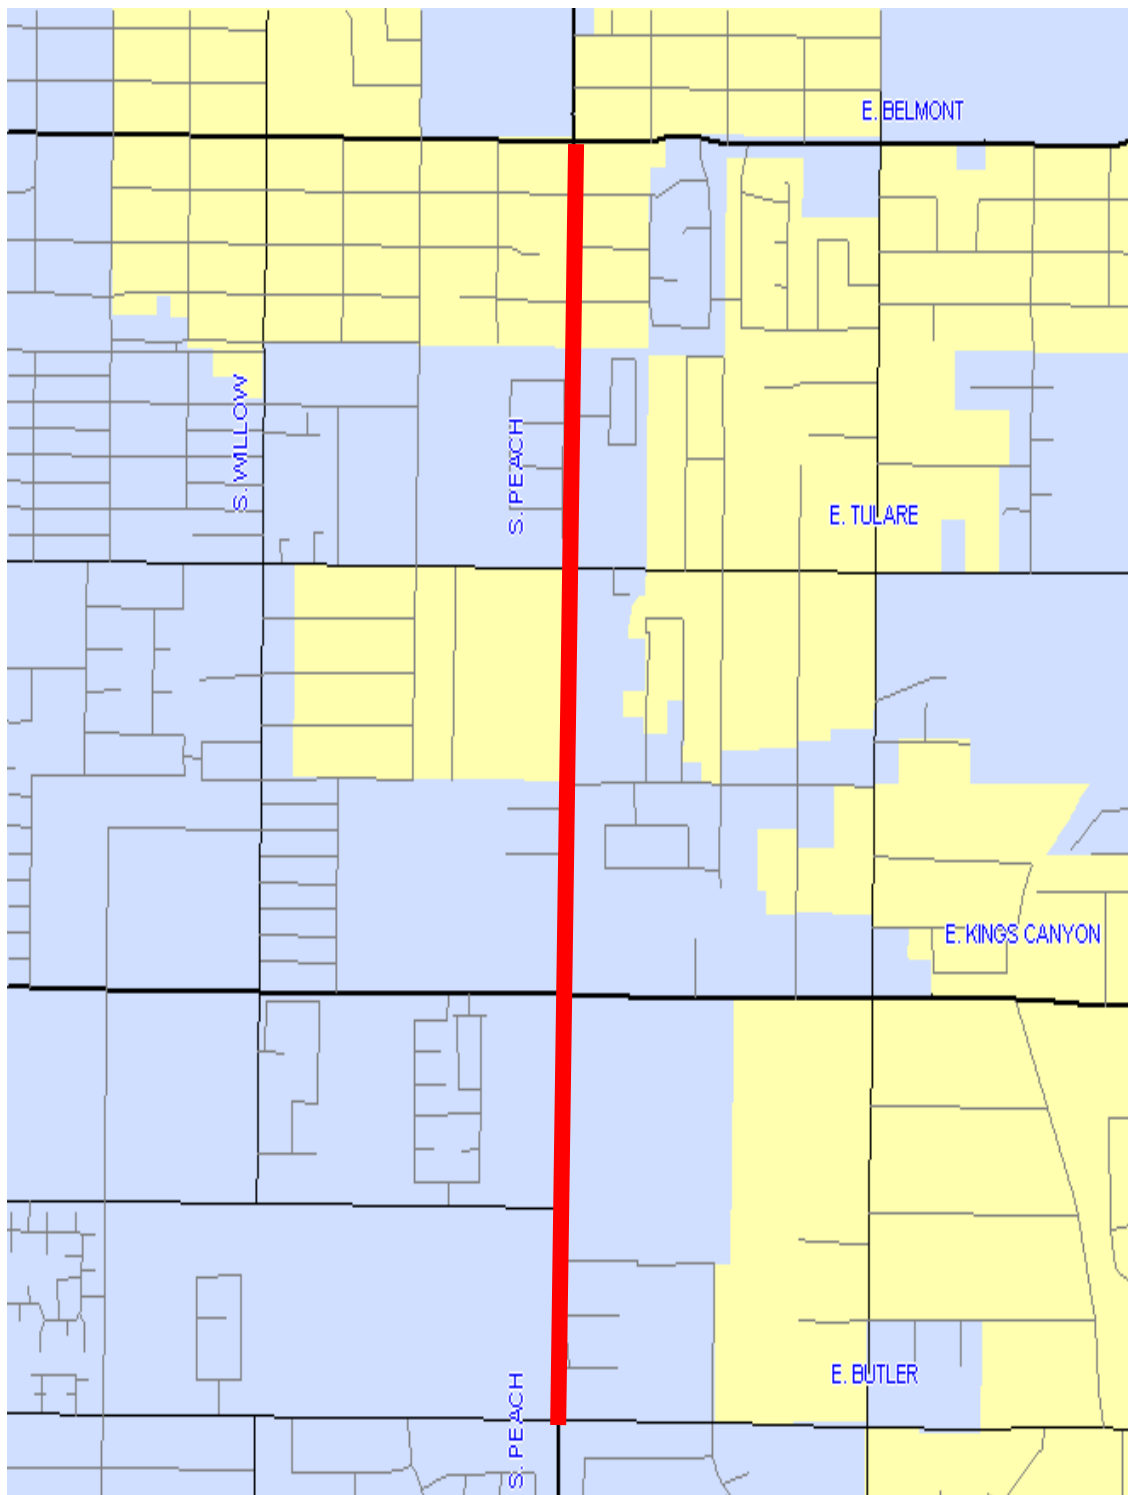

Traffic Congestion Relief Program (TCRP)

**Agency Partners:**

City of Fresno and Caltrans.
